

Cast type hydrants

Standard characteristics

Body construction type: Cast Iron

Design pressure: 16 bar

Hydraulic test pressure: 21 bar

Welded body: Cast Iron

Body diameter: From 2" to 6"

Inlet flange: According to EN 1092-2 pn16, same diameter as body

Number of outlets: On request

Outlet connections: Couplings UNI, AFNOR, BRITISH, GOST, STORZ

Outlet valves: Possibility of many types of valves: Gate valves, globe valves, ball valves, pressure reducer valves etc.

Coating: Epoxy Primer + Polyurethane red coat RAL3000, Total DFT >120 µm

Approvals

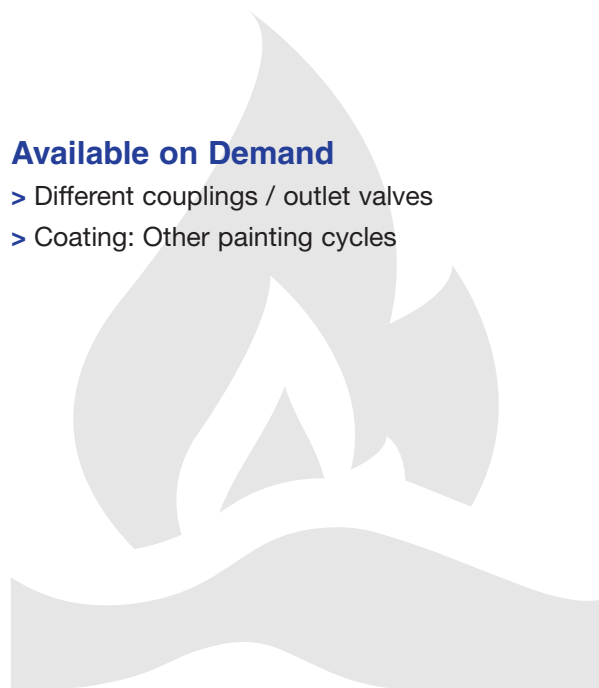

Notes

In case of inquiry and/or order specify the following datas:

- > Body diameter, valves and couplings type, underground part length

Available on Demand

- > Different couplings / outlet valves
- > Coating: Other painting cycles
