

Mod. NHF 1

high expansion foam generator dynamic type BV & TUV approved to be installed in enclosed spaces with presence of hot air and pollution, according to UNI EN 13565

Standard characteristics

Flow Rate: 100 l/1' 2 Barg

Body material: Stainless steel AISI 304

Nozzles material: Brass

Turbine material: Aluminium and brass

Fan material: Synthetic high resistance

Connection: 2" BSP M

Coating: Pickling and electropolishing

Weight: ~ 23 Kg

Expansion ratio: According to EU EN -13565 -1 and NFPA 11 rules

Approvals

Notes

In case of inquiry and/or order specify the following datas:

- > Body material, Connection type

Optional

- > Support for floor installation
- > Interception gate valve

Available on Demand

- > Execution in self-induction version, with connected 100 lt foam tank
- > Flanged connection
- > Body material in stainless steel 316
- > Coating: Other painting cycles
